#### DETAILED ACTION

### Election/Restrictions

Claims 4-5 and 8-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species [embodiments, figures 5-12], there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on /04/01/2005.

## **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 and 6-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-23 of U.S. Patent No. 6,822,547. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both claiming the same.

Saito et al. [US 6,822,547] discloses a current transformer comprising a Rogowski coil with its structure/arrangement [see claims 21-23].

Saito et al. discloses the instant claimed invention except for the specific arrangement of the printed circuit board surfaces and additional of the return circuit line.

The specific arrangement of the printed circuit board surfaces and additional return circuit line would have been an obvious design consideration based on the intended applications/environments use.

### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Altman et al. [US 5,055,816]; Swanberg [US 4,803,425]; Foster [US 3,668,587] and UK 2,342,783.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUYEN T. NGUYEN whose telephone number is 571-272-1996. The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, ELVIN ENAD can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
